TERC is a non-profit professional service organization that has been helping districts and schools close achievement gaps for over 15 years.

# Using Data 4-Part Series— Professional Development for Data Teams

## Description

Each workshop is one full day. You may choose all or some workshops. These workshops can be offered as an openenrollment series through a professional association, collaborative, or school network.

Workshop 2 is a Prerequisite for Workshop 3.

## Intended Audience

Administrators, Principals, Data Coaches, and Classroom Teachers.

## Learning Outcomes

The four Workshops include:

1. Launch a High-Performing Data Team
2. Data Analysis I: Build Data Literacy and Drill Down
3. Data Analysis II: Drill Down to Identify Student Learning Problems
4. Verify Causes of Student Learning Problems

TERC's Using Data Project offers several high-quality and practical 1-day workshops that help build data literacy skills leading to improved outcomes.

However, our primary commitment is to help education leaders plan comprehensive professional development programs that are customized to local needs and that build collaborative inquiry and data literacy skills across all stakeholders in a school or district.
